

Crunzh NetEdit V1.5

Welcome to Crunzh NetEdit. NetEdit is a basic text editor with a lot of internet capabilities which is especially useful when you are creating web pages.

Features

- ✓ Small and fast.
- ✓ Build in FTP. So you can put your files on the Internet fast.
- ✓ The ability to grab a page directly off the web.
- ✓ Lots of keyboard shortcuts.
- ✓ Right click menus for fast access.
- ✓ Easy preview function.

Upload

To upload a file start by entering the address of you server (i.e. ftp.crunzh.com) in the field named host and your username and your password in their respective fields. Then click connect.

Then put in the name you want to give the file (i.e. index.html) in the field named remote filename. When that's done press the disconnect button.

Get File

To download a file from the internet simply put in the URL (i.e. www.crunzh.com/index.htm) in the blank field and press the button labeled get file.

Contact and Support

Our email address is: support@crunzh.com and we would appreciate any kind of constructive criticism and suggestions.

If you have any problems with this program please send your email to support@crunzh.com with information on your OS (win95/98/2000/NT/XP) and what

you were doing at the time the problem occurred. This will make it much faster and easier to help you.

The newest version of this program can be downloaded on the address

<http://www.crunzh.com>

Copyright and Disclaimer

Net Edit has been tested on very different kind of configurations, but it is possible that someday, somewhere, one of the untested conditions will happen and cause strange behavior (You are encouraged to report any strangeness, of course!). So we take no responsibility in eventual time loss, data loss, or anything else.

Feel free to use this program as you like, spread it, give it to your friends and put it on your Web pages or on your favorite FTP site, etc., as long as:

- ✓ No charge is added.
- ✓ You send us an email. We'd like to know if you like the program, and to keep track of it.
- ✓ If you put it on a Web or FTP facility, the reference to us is shown.
- ✓ That you only distribute the original setup.exe with no modifications.
